

MAGNETS

Some objects will stick to magnets especially iron

Magnets can be used to push or pull objects together

Magnets can be used in many ways:

- holding objects in place

- in doorbells

- in speakers

- in phones

- in compasses

- in electric motors

- in hospital testing machines

- in jewelry

- wrecking balls

Magnets have a magnetic **North** pole and a magnetic **South** pole. If the same pole of 2 magnets are placed near each other, they will push away (**repel**), while if different poles are placed near each other, they will pull together (**attract**).

Magnetism is a force.
