*Handbook of Research on Connecting Research Methods for Information Science Research* Ngulube, Patrick, 2019-12-13 In today's globalized world, viable and reliable research is fundamental for the development of information science. Innovative methods of research have begun to shed light on notable issues and concerns that affect the advancement of knowledge within information science. Building on previous literature and exploring these new research techniques are necessary to understand the future of information and knowledge. The Handbook of Research on Connecting Research Methods for Information Science Research is a collection of innovative research on the methods and application of study methods within library and information science. While highlighting topics including data management, philosophical foundations, and quantitative methodology, this book is ideally designed for librarians, information science professionals, policymakers, advanced level students, researchers, and academicians seeking current research on transformative methods of research within information science.

*Tracing Invisible Lines* David Prescott-Steed, 2019-02-28 TRACING INVISIBLE LINES is a critical autoethnographic text built around Gregory Ulmer's concept of the *Mystory*. Dedicated to the enhancement of imagination and innovation in a digital media saturated society, Ulmer's *Mystory* is a creative research method that draws narratives from three domains of discourse: personal, professional, and popular. Analysing these domains means generating fresh insight into the deep-seated emblems that drive the creative disposition or invariant principle of the practice-led researcher. Here, the *mystoriographical* approach has mobilized an exploration of the interrelations between self and society, between memory and imagination, as well as between industry-driven design, arts, education, and experimental sound art practice, prioritizing the sonic, the perambulatory, and careering. As a result, the *Mystory* fosters critical awareness of the socio-cultural instruments of creative inspiration and perspiration. Reflexive in intent and experimental in approach, David Prescott-Steed's hybrid writing style moves freely between art, historical, biographical, and autobiographical, academic, and speculative moods. This book's emphasis on an electronic, investigative, sound-based practice finds it treading new ground between the sonic arts and the field of *electracy* through its addition of sound and music to the genre. This book extends the scope of studies into Ulmer's work beyond English literature and the ocularcentric arts, offering a new handbook for sonic conceptual art practice.
