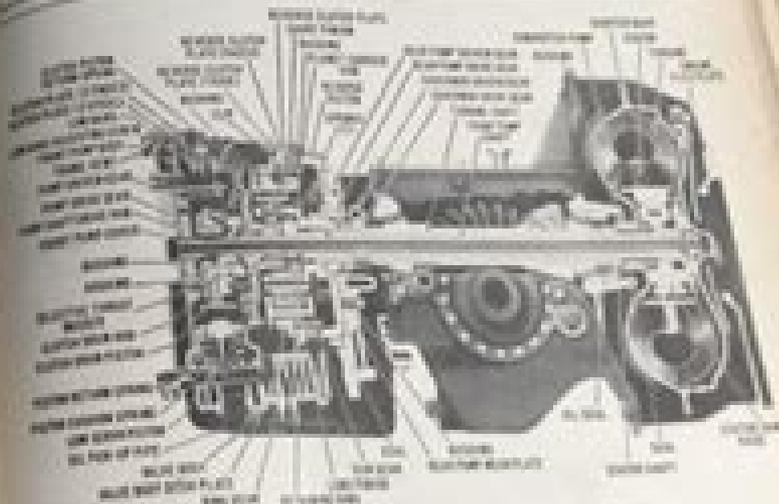

Fig. 1. Powerglide

DESCRIPTION

The Corvair Powerglide transmission is a four-speed manual transmission. It is designed to provide smooth, quiet operation and long service life. The transmission is constructed from high-strength materials and is available in both standard and heavy-duty versions. The standard version is suitable for most Corvair models, while the heavy-duty version is designed for increased load capacity and performance. The Powerglide transmission is a key component of the Corvair drivetrain, and its proper maintenance is essential for optimal vehicle performance.

MAINTENANCE

Adding Oil
The Corvair Powerglide transmission requires regular oil changes to ensure proper lubrication and performance. The recommended oil grade is SAE 90, and the oil should be changed at intervals of 3,000 to 5,000 miles, depending on driving conditions. To add oil, locate the oil filler plug on the side of the transmission housing. Remove the plug and use a funnel to pour the recommended amount of oil into the transmission. After adding the oil, reinsert the plug and check the oil level. Regular oil changes will help prevent wear and tear on the internal components of the transmission, extending its life and ensuring smooth operation.

Auto Mechanic Manual
