

AutoCAD Architecture helpful hints:

Q1. The tool palette is very important in AutoCAD Architecture since it is required to draw some typed of objects easily. If it gets turned off by accident, how can I turn it back on?

A1. Home tab> Tools >Design Tools.

Q2. How can I insert 3D furniture blocks or other 2D/3D "content" into your drawing?

A2. Insert tab>Content Browser>Design Center.

Q3. How do I set the size of text or dimensions?

A3. Use Annotative notes and dimensions styles. They will be set properly for the scale of your model space or layouts and change size if you change the scale. Note that in AutoCAD Architecture model space has a scale. If you have multiple viewports with different scales where you want some but not all notes and dimensions to show, turn off the annotative light bulb near the bottom of the screen. Only notes and dimensions created at that viewport scale will be visible. If you want the same note or dimension to show up in more than one viewport, click on the note or dimension>right click>Add/Delete Scale...>the "Annotative Object Scale" dialogue box will appear>select the scales you want it to appear in. The annotation icon with the lightning bolt next to it: if off when you change scales of a viewport the notes and dimensions already drawn for that scale will disappear, if it is turned on it will add the new scale to the list of scales and display them in the viewport.

To edit a dimension style, Home tab>Annotation panel>drop down the arrow to the right of the word Annotation>select the icon for Dimension with the paintbrush. This will open up the Dimension style manager>click Modify.

Q4. How do I put notes into the drawing?

A4. There are two types of notes, "General Notes" and "Callout Notes" that point to an object on the drawing.

For General Notes, select Home tab>Annotation panel>Text.

For Callout Notes, use a "Multileader" Home tab>Annotation panel>Multileader (the icon with the arrow and a circle at the end). If you snap a Multileader arrowhead to a point on an object, when the object is moved, the arrowhead moves with it.

To edit a Multileader style, Home tab>Annotation panel>drop down the arrow to the right of the word Annotation>select the icon for Multileader with the paintbrush. This will open up the Multileader style manager>click Modify.

Q5. How can I use textures in my drawing?

A5.

Step 1: right click in Command Prompt area and select "Options." Select Files tab. Plus out "Texture Maps Search path" and change the path for finding textures to the
