**Market Manipulation and The Price of Eggs** David Ress,2025-08-01 This Palgrave Pivot presents a microhistory of an important but little known incident of futures trading The case in question concerns an incident in the futures market operated by the Chicago Board of Trade CBOT in 1968 where an individual trader David Henner was able to set an unusually and ultimately unjustified high closing price for delivery of eggs in six months By examining the legal and economic theoretical context of this incident the book argues that the definition of market manipulation is not straightforward and has been complicated by a reluctance among regulators to accept the idea that ordinary market dynamics can produce a false price Unlike most other cases of financial market manipulation the finding here did not involve a market corner or some form of insider trading but instead suggested

that the inherent dynamics of an open outcry market could produce an unreal price As narrative history it offers scholars and practitioners of financial market regulation and operation a valuable way of looking at why otherwise inexplicable breaks in prices occur This book will be valuable reading for those interested in law and economics financial regulation and the history of commodities and futures trading *Commodities Futures Trading* David Nicholas,1985 **The Concise Handbook of Futures Markets** Perry J.
