During the time period from the 13th century to 1405 the Mongols dominated a great majority of Asia. The Mongols had a unique way of life and different traditions that China and the Russia didn't. This caused the Mongols to have certain political, economic, and social ideas that were different from both China and Russia. However, there were many similarities between the Mongols and Russia and China during this time period because they lived so closely together with human interaction and weren't isolated from everyone else.

The Mongols had significant political and economic impact on both Russia and China during their rule, but China was more widely affected, being ruled directly by Mongols, whereas Russia was largely left to its own devices under independent principalities and felt Mongol influence largely via taxes. As a result, the Mongols take this as an opportunity to tax them and make the Russians pay tribute as a way of "thanks" (you just conquered me). Also, as a result of being conquered the capital of Kiev is destroyed and Moscow begins to rise. The Mongol rule effected Russia mostly because of the Christian separation from Western Europe and the Renaissance. This was a major turning point for Russian history. The Chinese were ruled more by Kubical Khan himself than Russia was.

During this time period in China although the imperial structure remained the same, the gender roles in their society began to change. As a result, Chablis, the wife of Kubical Khan was one of his most important advisors of political matters. One policy that Kubical was against was that he refused to bring back civil service examinations because he didn't want to give power to the scholars. A difference between the way Russia was run and China was run was that China had astute and tolerant rulers. The Mongols were very tolerant towards both the Chin
