WHAT IS IMAGE?

- Projection of 3D scene in to 2D Plane
- It is two dimensional function, $f(x,y)$ X and Y are called Spatial Coordinate and f at any coordinate is called intensity or grey level of the image at that point.

- Depending Up the characteristics intensity and Coordinate image classified in to two

1. **Analog Image:-** value of x,y and f (coordinate and intensity) are continuous values

We can convert analog image to digital image using sampling and quantization.

2. **Digital Image:-** When x, y and the amplitude values of f are all finite and discrete quantities then the image is referred as digital image. A digital image is composed of a finite number of
