

DEARBORN
LOADERS
MODELS 19-59 AND 19-60

ASSEMBLY AND OPERATING INSTRUCTIONS

The Dearborn Loaders are designed to meet the requirements and demands for equipment of this type. The versatility of the Dearborn Loaders enables the operator to perform a wide variety of loading operations efficiently and economically. The welded tubular steel construction provides light weight with maximum strength. The Model 19-59 and 19-60 loaders have been especially designed for use on the Model NAA Ford Tractor.

This manual contains two sections: Section One presents information concerning the Dearborn Standard Loader, Model 19-59, and Section Two covers the Dearborn Heavy Duty Loader, Model 19-60. Because there are a number of parts and assembly steps which are common to both models, reference is occasionally made to Section One when installing

the Dearborn Heavy Duty Loader.

The assembly procedure given for each loader is based on mounting the loader on the tractor and assembling it at the same time. The work can easily be done by two men; however, where a suitable chain fall or hoist is available, the loader may be completely assembled on the floor and then with the aid of the hoist, be positioned for mounting on the tractor. In either case, certain work must be done on the tractor itself before the loader is mounted in place.

This manual contains information on the assembly, operation, lubrication and adjustments. Read it carefully, follow the illustrations and keep it available for ready reference.
