

## Color & Label: Volcanoes

**Directions:** Just because the odds of something happening are low doesn't mean it CAN'T happen. No matter how strong a society or how technologically advanced we become, one volcanic eruption can wipe the slate completely clean. It's important to know what's going on inside of these sleeping giants.

To the right is a cross-section of a volcano and the layer below. **Color the image**, but more importantly, label each of the major parts of a volcano. Here's the twist, you have to identify the letter, the term, and the definition. To make it interesting, some have already been provided. **Fill in the rest of the chart** with the missing pieces to describe what is happening in the image.

Upon completion, feel free to color or doodle anywhere else on the page! Cut out the large squares when ALL pages are finished.
