

Chapter 8
Understanding Populations
8.1 How Populations Change in Size
8.2 How Species Interact with Each Other

8.1 Objectives

- Describe the three main properties of a population.
- Describe exponential population growth.
- Describe how the reproductive behavior of individuals can affect the growth rate of their population.
- Explain how population sizes in nature are regulated.

What Is a Population?

- _____ is a group of organisms of the same species that live in a specific geographical area and interbreed.
- A population is a reproductive group because organisms usually breed with members of their own population.
- The word *population* refers to the group in general and also to the size of the population, or the _____ it contains.

Properties of Populations

- _____ is the number of individuals of the same species in that live in a given unit of area.
- _____ is the pattern of distribution of organisms in a population. A population's dispersion may be even, clumped, or random.
- Size, density, dispersion, and other properties can be used to describe populations and to predict changes within them.

How Does a Population Grow?

- A population gains individuals with each new offspring or birth and loses them with each death.
- The resulting population change over time can be represented by the equation below.

How Does a Population Grow?

- _____ is an expression of the increase in the size of an organism or population over a given period of time. It is the birth rate minus the death rate.
- Overtime, the growth rates of populations change because birth rates and death rates increase or decrease.
- For this reason, growth rates can be _____.
