

# WHAT'S NEW: BUSINESSOBJECTS XI – ALL RELEASES

BusinessObjects XI Release 2  
BusinessObjects XI Release 2 builds on the world's leading business intelligence platform. BusinessObjects XI Release 2 delivered improved simplicity for end users, increased trust in data, and the opportunity to standardize on a single business intelligence platform.

## INTRODUCTION

BusinessObjects™ XI is the first and only business intelligence (BI) platform to deliver a complete set of market-leading, end-to-end BI capabilities: best-in-class enterprise performance management (EPM), dashboards and visualization, reporting, query and analysis, and enterprise information management (EIM). BusinessObjects XI introduces significant innovations that deliver BI in new ways to a much broader set of users. It includes Crystal Reports®, the industry standard for enterprise reporting.

BusinessObjects XI Release 2 (October 2005) was built upon the proven and trusted BusinessObjects XI platform (December 2004). It provided substantial functional improvements and innovations across the BusinessObjects XI platform and included full platform-level support for BusinessObjects Desktop Intelligence™ (formerly BusinessObjects full client) to allow a smooth transition path to BusinessObjects XI for all existing customers who have invested in that technology.

BusinessObjects XI Release 2 Productivity Suite (marked "PS" below), the latest version, further extends the breadth of the XI platform. For details on the dashboards and visualization, reporting, query and analysis, and BI platform parts of Productivity Suite, please see "What's New: BusinessObjects XI Release 2 Productivity Pack" on [www.businessobjects.com](http://www.businessobjects.com).

What's new in BusinessObjects XI depends on where you're coming from—Business Objects 5.x/6.x, Crystal v10 or both. For that reason, this document contains three sections:

- New for all users
- New for users of BusinessObjects 5.x/6.x
- New for users of Crystal v10

## NEW FOR ALL USERS

### Business Intelligence Platform Search

In May 2006 Business Objects delivered the first of a series of new innovative capabilities to bring the simplicity of search to the world of business intelligence. This allowed joint Google and Business Objects users to search using the familiar Google interface and retrieve, index, and deliver BI content, presentations, business content in documents and web pages.

In this release, an additional set of capabilities further advances the concept of search-based business intelligence, reducing the time and effort to find specific data or reports to answer business questions. This is delivered from directly within the BI portal InfoView. Simply by entering text into the search box within InfoView, users quickly see a relevant, categorized, and ranked set of results from within their BusinessObjects XI system.
