Economics Paper 1 November Exam Exemplar 2013 Caps:

The Performative State Iza Yue Ding, 2022-09-15 What does the state do when public expectations exceed its governing capacity The Performative State shows how the state can shape public perceptions and defuse crises through the theatrical deployment of language symbols and gestures of good governance performative governance Iza Ding unpacks the black box of street level bureaucracy in China through ethnographic participation in depth interviews and public opinion surveys She demonstrates in vivid detail how China's environmental bureaucrats deal with intense public scrutiny over pollution when they lack the authority to actually improve the physical environment They assuage public outrage by appearing responsive benevolent and humble But performative governance is hard work Environmental bureaucrats paradoxically work themselves to exhaustion even when they cannot effectively implement environmental policies Instead of achieving performance legitimacy by delivering material improvements the state can shape public opinion through the theatrical performance of goodwill and sincere effort The Performative State also explains when performative governance fails at impressing its audience and when governance becomes less performative and more substantive Ding focuses on Chinese evidence but her theory travels comparisons with Vietnam and the United States show that all states democratic and authoritarian alike engage in performative governance

The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people

Service Provision and Migration Simon J. Tans, 2017-07-03 This book investigates how liberalization of service

provision related to movement of natural persons takes shape within EU and WTO law It provides an overview and analysis of the implementation of the identified obligations derived from EU law and the GATS in the Dutch legal order and that of the United Kingdom A thorough investigation of the chosen strategies in each legal order is provided including a comparison of the differences and similarities between these strategies The resulting overview leads to insight into the tension that exists between the international obligations related to service mobility of the two investigated states on the one hand and their migration law and access to the labour market legislation on the other

Military Review, 2019 **Enhanced Cooperation and European Tax Law** Caroline Heber, 2021-06-17 The enhanced cooperation mechanism allows at least nine Member States to introduce secondary EU law which is only binding among these Member States From an internal market perspective enhanced cooperation laws are unique as they lie somewhere between unilateral Member State laws and uniform European Union law The law creates harmonisation and coordination between the participating Member States but may introduce trade obstacles in relation to non participating Member States This book reveals that the enhanced cooperation mechanism allows Member States to protect their harmonised values and coordination endeavours against market efficiency Values which may not be able to justify single Member State s trade obstacles may outweigh pure internal market needs if an entire group of Member States finds these value worthy of protection However protection of the harmonised values can never go as far as shielding participating Member States from the negative effects of enhanced cooperation laws The hybrid nature of enhanced cooperation laws their nexus between the law of a single Member State and secondary EU law also demands that these laws comply with state aid law This book shows how the European state aid law provisions should be applied to enhanced cooperation laws Furthermore the book also develops a sophisticated approach to the limits non participating Member States face in ensuring that their actions do not impede the implementation of enhanced cooperation between the participating Member States
