Economics Past Paper Grade 12 June 2014 Paper 2:

Capitalism's Crises Vishwas Satgar, 2015-10-01 The contributors to this volume draw on a non dogmatic Marxist approach to explain the systemic and conjunctural dynamics of crisis inherent in global capitalism Their analysis asks what is historically specific to capitalism s crises while avoiding catastrophic or defeatist claims At the same time the volume situates left agency within actual patterns of resistance and class struggle to clarify the potential for transformative change The cycle of resistance strengthened by the World Social Forum and transnational activism is now punctuated by the experience of the Arab Spring the agency of anti systemic movements left think tanks the Occupy Wall Street Movement labour unions left parties in Europe such as Syriza and Podemos and peoples budgeting in Kerala India On the down side we are witnessing the waning of the Workers Party in Brazil and serious challenges for South Africa s once powerful labour movement and still formative social justice activism All these developments are assessed in this volume This is the second volume in the Democratic Marxism series It elaborates on crucial themes introduced in the first volume Marxism in the 21st Century Crisis Critique and Struggle edited by Michelle Williams and Vishwas Satgar **The Annalist** ,1918 Critical Times in Greece Dimitris Dalakoglou, Georgios Agelopoulos, 2017-10-20 This volume brings together new anthropological research on the Greek crisis With a number of contributions from academics based in Greece the book addresses a number of key issues such as the refugee crisis far right extremism and the psychological impact of increased poverty and unemployment It provides much needed ethnographic contributions and critical anthropological perspectives at a key moment in Greece s history and will be of great interest to researchers interested in the social political and economic developments in southern Europe It is the first collection to explore the impact of this period of radical social change on anthropological understandings of Greece **The New York Times Annalist** ,1918 **Yearbook of International Organizations 2014-2015, Volumes 1A And 1B (SET)** Union of International Associations, 2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events The Growing Gap in Life Expectancy by Income National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Mathematical Sciences and Their Applications, Division of Behavioral and Social Sciences and Education, Committee on Population, Committee on the Long-Run Macroeconomic Effects of the Aging U.S. Population--Phase II, 2015-09-17 The U S population is aging Social Security projections suggest that between 2013 and 2050 the population aged 65 and over will almost double from 45 million to 86 million One key driver of population aging is ongoing increases in life expectancy Average U S life expectancy was 67 years for males and 73 years for females five decades ago the averages are now 76 and 81 respectively It has long been the case that better educated higher income people enjoy longer life expectancies than less educated lower income people The causes include early life conditions behavioral factors such as nutrition exercise and smoking behaviors stress and access to health care services all of which can vary across education and income Our major entitlement programs Medicare Medicaid

Social Security and Supplemental Security Income have come to deliver disproportionately larger lifetime benefits to higher income people because on average they are increasingly collecting those benefits over more years than others This report studies the impact the growing gap in life expectancy has on the present value of lifetime benefits that people with higher or lower earnings will receive from major entitlement programs The analysis presented in *The Growing Gap in Life Expectancy by Income* goes beyond an examination of the existing literature by providing the first comprehensive estimates of how lifetime benefits are affected by the changing distribution of life expectancy The report also explores from a lifetime benefit perspective how the growing gap in longevity affects traditional policy analyses of reforms to the nation s leading entitlement programs This in depth analysis of the economic impacts of the longevity gap will inform debate and assist decision makers economists and researchers
