Section 2: The national economy in a global context

This Answers document provides suggestions for some of the possible answers that might be given for the questions asked in the workbook. They are not exhaustive and other answers may be acceptable, but they are intended as a brief guide to give teachers and students feedback.

Topic 1 The measurement of economic performance

Macroeconomic objectives

- 1 EITHER economic growth is the percentage change in GDP measured over a period of time OR economic growth is the increase in the economy's productive capacity over a period of time.
- 2 Distribution of income refers to how evenly (or not) incomes are shared out across the population.
- 3 The balance of payments is a record of the financial transactions undertaken between the UK and the rest of the world for a specific period of time. Award 2 marks to those who just define current account or balance of trade.
- 4 Where the average level of prices remains broadly constant over a period of time or rises by no more than the official target range of CPI inflation (1–3%).
- 5 (b) and (c)
- 6 A rise in national income is referred to as economic growth, whereas a rise in economic growth refers to a faster rate of economic growth.
- 7 Incomes of the poorest have risen but if richer households have seen their incomes rise by more than 10% then inequality — the gap between rich and poor — will have widened.
- 8 An objective is an aim the government wishes to achieve for the macroeconomy, whereas a policy is a tool or instrument which helps the government to achieve its objectives for the macroeconomy.
- 9 £1,408,316 million. 2 marks for percentage increase and 2 marks for correct numbers
- 10 \$965.5172 billion. 2 marks for attempt to use numbers and 2 marks for realisation that it is not the same as subtracting 1.5%. Rounding may give different degrees of accuracy.
- 11 £468,768 million. 2 marks for percentage increase and 2 marks for correct numbers
