Keeley ,2014-04-01 Children are continually developing ideas and explanations about their natural world Some of these ideas  
are consistent with the science children are taught others differ significantly from scientific explanations Many of these ideas  
will follow students into adulthood if they remain hidden from the teacher and unresolved The challenge for teachers is to  
find ways to elicit these ideas and then use appropriate strategies to move students learning forward Page Keeley author of  
the bestselling NSTA Press series *Uncovering Student Ideas in Science* You don t have to become a mind reader to  
understand the ideas young students bring to science class This collection will help you draw out and then recognize what  
students know or think they know about the natural world *What Are They Thinking* is a compendium of 30 Formative  
Assessment Probes columns from NSTA s elementary journal *Science and Children* Each chapter provides A sample  
formative assessment probe a set of interesting questions that root out commonly held often mistaken ideas Geared to  
elementary students probe topics range from why you can see the Moon in the daytime to where water goes when it  
evaporates to what is or isn t a rock Your students answers to each probe will help you take a step back and figure out how to  
guide them from where they are conceptually to where they need to be Accompanying teacher notes easy to grasp
