

**Key Concepts:**

1. Literacy Traditions from Home and Community
2. Culturally Related Responses to Classroom Organization
3. First Things First: Safety and Security

**Describe the ways these concepts will assist you in supporting student success.**

- By incorporating literacy traditions that students may use within their home and/or community you are opening the door to you becoming aware of the literacy knowledge your students bring with them. Literacy knowledge stems not only from prior schooling but also from experiences with the ways reading and writing are used in the home and community.
- By allowing culturally related responses to classroom organization, cultural differences that may interfere with student participation in learning activities in the classroom- this gives the chance for students to speak up if something were not right in their educational environment. Cultural differences in teaching practices thus present challenges to teachers, students, and parents alike so if something is not being understood by the student they have the opportunity to speak up.
- Safety and security is always key in classrooms- a classroom should be a safe space for teachers and students. By keeping a learning environment safe, students may learn happily without worry- only needing to worry about their grades of course.

**List any teaching strategies you can use to optimize student participation and learning.**

- *Teach students skills needed to participate with classmates-* By doing so the students who are already fluent in English may assist those who may not be that far with participation through demonstration and simple communication. By teaching the importance of participation with classmates they can learn to work together
- *Ask students to assess their own participation-* By asking students to assess their participation they can see where and where no improvement is needed. This encourages reflection.
- *Encourage students to ask questions -* Students should be able to communicate in a classroom if there is ever something they need their teacher to elaborate further on, a simple question can go a long way in a student's overall understanding of a task that needs to be done such as assignments and even presentations.
