An Instrumentalist Theory of Political Legitimacy Matthias Brinkmann, 2024-07-19 We are all subjected to the power of the state and other entities such as the EU But what justifies the far reaching power of these institutions Standard theories suggest that consent democracy or justification make exercising power legitimate This book however argues that these approaches do not survive philosophical scrutiny Instead it develops a radical theory of political legitimacy according to which power is justified because of the outcomes it brings about It does not primarily matter then how power is exercised instead we should focus on what it achieves This is the first book length treatment of instrumentalism It outlines the structure and core moral commitments of the theory and considers in detail how it is best formulated In particular the book sketches an abstract theory of justice and argues that our primary aim in distributing political power should be to promote justice Instrumentalism is also contrasted with the three leading theories of legitimacy based on consent democracy and public justification Not only are these competing theories unpersuasive but it is also shown that instrumentalism can replicate some of their appeal in its own way The book also untangles some conceptual confusions concerning political legitimacy One mainstream view is that legitimacy requires authority the ability to give binding commands to people This book argues against the necessity of authority and develops an authority less model of legitimacy defining legitimacy as the separate and distinctly moral problem of justifying political power This book will appeal to anyone interested in the moral foundations of justified political power and especially to researchers in philosophy political theory and law
