

\_\_\_\_\_ are eukaryotes, which means that they have a \_\_\_\_\_ and membrane bound organelles. Most are unicellular but some of the algae can be multicellular.

Protists can be broken down into 3 categories: animal-like protists, plant-like protists and fungi-like protists.

Protist	Definition	Example	Picture
(Animal-like protists)	eukaryotes with animal-like characteristics- are heterotrophs	Amoeba, paramecium	
(Plant-like protists)	eukaryotes with plant-like characteristics- have chloroplasts and are autotrophs- perform photosynthesis	diatoms, seaweed	
Fungi-Like (Some _____)	eukaryotes which act like fungus- are heterotrophs and decomposers	slime & water molds	

**Fungus-Like Protists**

The fungus-like protists are \_\_\_\_\_ and receive their nutrients by decaying and decomposing dead matter. Unlike regular fungi, they do NOT have a cell wall made of \_\_\_\_\_.

Fungus-like slime molds can be broken down into 2 categories:

1. \_\_\_\_\_
2. \_\_\_\_\_

**Slime Molds**

\_\_\_\_\_ alternate between two stages.

In one stage they have the ability to \_\_\_\_\_ from one area to another and ooze like blobs- much like how the protozoan amoeba does. They can move as single cells or they can merge together and form a large blob. During this stage, they feed on matter found in nutrient-rich soils.

The second stage is a \_\_\_\_\_ body that emerges only when the conditions are harsh or their food source has been depleted. All of the single cells merge together and form a fruiting body that contains spores that can withstand the lack of nutrients and harsh environment. The slime mold will emerge from the spores when the conditions are favorable again.

**Water Molds**

\_\_\_\_\_ molds thrive on dead and decaying matter in water and some are plant parasites. The water mold *Phytophthora blight* caused the potato famine in Ireland in 1845. The summer of 1845 was unusually wet and cool which was ideal for the protist to grow. Over 60% of the potato crop that year was ruined by the mold. Poor potato farmers that depended on the crop for their living and food either died of starvation or decided to migrate to the United States.
