Climate Change and Biodiversity: Introduction; CH:2 Managing Variability in Climate Change; CH:3 Global Warming and Climate Change; CH:4 Value and Threats of Biodiversity; CH:5 The Effects of Climate Change on Ecosystems; CH:6 Conservation of Biodiversity and Ecosystem; CH:7 Environmental Ecology; Bibliography; Index Chris Turner, 2018 **Climate Change and Conceptual Change** David Joseph Clark, 2013 Global Warming GW is easily one of the most pressing concerns of our time and its solution will come about only through a change in human behavior Compared to the residents of most other nations worldwide Americans report lower acceptance of the realities of GW In order to address this concern in a free society U S residents must be convinced or coerced to take the necessary actions In spite of the democratic appeal of education however many climate communicators appear to be settling on the notion that emotional persuasion is superior to education We ll set an empirical foundation in Chapter 2 reviewing an experiment in the Numerically Driven Inferencing NDI paradigm that sheds some light on the cognitive processes involved in learning and attitude shifts in response to surprising policy relevant information Chapters 3 6 contain results from a comprehensive program of research specifically targeting climate related attitudes and beliefs in the United States As alluded to above there have been many surveys of American attitudes Chapter 3 provides an overview of our approach to assessing climate related beliefs and attitudes In particular we note relationships observed in one survey between scientific literacy regarding the GW mechanism on one hand and attitudes including willingness to sacrifice on the other As with some other empirical approaches our results suggest that U S residents generally accept anthropogenic i e human caused climate change and support action on this issue But even if this is the case Chapter 4 describes an experiment demonstrating that

these beliefs and attitudes are disturbingly fragile in the face of cherry picked misleading numerical facts Chapter 5 then describes a pair of experiments evaluating the effects of representative numerical facts Chapter 5 s Study 1 Section 5 1 demonstrates that even when students report strong psychological effects after receiving a set of surprising numbers their beliefs and attitudes will not necessarily be affected Chapter 5 s Study 2 Section 5 2 improves upon the clarity of materials used in Study 1 and demonstrates that such materials can effectively increase climate change acceptance and concern In both of these studies as with the study presented in Chapter 4 this relatively uncontextualized surprising numerical information undermines students confidence in their own knowledge Chapter 6 reports on three successful experiments spanning four samples that provide a coherent explanation of the mechanism of climate change that includes relevant numerical facts As with Study 2 in Chapter 5 this intervention shifts participant attitudes towards the scientific consensus Unlike uncontextualized numerical information however this mechanism intervention additionally leaves participants feeling that they know more than they did prior to instruction Chapter 6 s Study 1 Section 6 1 establishes this effect in classroom based settings at two culturally distinct universities Chapter 6 s Study 2 Section 6 2 provides an initial evaluation of the time course of retention for the cognitive shifts that followed our mechanism intervention and Chapter 6 s Study 3 Section 6 3 provides a successful demonstration of durable shifts with the general population online Taken together these experiments point the way towards effective curricula and on line materials that can help bolster support to combat climate change While we must certainly be sensitive to the needs values and interests of our target audiences we should not reflexively steer away from science education Indeed the experiments in this dissertation provide empirical support for the notion that science education materials can have a meaningful and lasting impact on GW attitudes and beliefs While this may not provide the complete behavioral solution we need for the United States and the world it seems likely that such shifts will make behavioral and policy changes far more tractable in the coming years *Climate Changes 2* John Happs John Happs,2021-11-30 Environmental Climate change book *Climate Changes 2* John Happs,2022-01-07 CLIMATE CHANGE INFORMATION **STATE OF THE WORLD 2002, CH.2, MOVING THE CLIMATE AGENDA FORWARD. ,2003**
