Access 20report Background:

Diversity in Practice Spencer Headworth, Robert L. Nelson, Ronit Dinovitzer, David B. Wilkins, 2016-04-01 Expressions of support for diversity are nearly ubiquitous among contemporary law firms and corporations. Organizations back these rhetorical commitments with dedicated diversity staff and various diversity and inclusion initiatives. Yet the goal of proportionate representation for people of color and women remains unrealized. Members of historically underrepresented groups remain seriously disadvantaged in professional training and work environments that white upper class men continue to dominate. While many professional labor markets manifest patterns of demographic inequality, these patterns are particularly pronounced in the law and elite segments of many professions. *Diversity in Practice* analyzes the disconnect between expressed commitments to diversity and practical achievements, revealing the often obscure systemic causes that drive persistent professional inequalities. These original contributions build on existing literature and forge new paths in explaining enduring patterns of stratification in professional careers. These more realistic assessments provide opportunities to move beyond mere rhetoric to something approaching diversity in practice.

Navigating Copyright for Libraries Jessica Coates, Victoria Owen, Susan Reilly, 2022-08-22 Information is a critical resource for personal economic and social development. Libraries and archives are the primary access point to information for individuals and communities with much of the information protected by copyright or licence terms. In this complex legal environment, librarians and information professionals operate at the fulcrum of copyright's balance, ensuring understanding of and compliance with copyright legislation and enabling access to knowledge in the pursuit of research, education, and innovation. This book, produced on behalf of the IFLA Copyright and other Legal Matters CLM Advisory Committee, provides basic and advanced information about copyright, outlines limitations and exceptions, discusses communicating with users, and highlights emerging copyright issues. The chapters note the significance of the topic, describe salient points of the law and legal concepts, present selected comparisons of approaches around the world, highlight opportunities for reform and advocacy, and help libraries and librarians find their way through the copyright maze.

From the Bottom Up Bernard Tenenbaum, Chris Greacen, Tilak Siyambalapitiya, James Knuckles, 2014-01-23 Most Sub-Saharan African countries try to promote rural electrification through both centralized and decentralized approaches. This guide focuses on the decentralized approach, providing practical guidance on how small power producers and mini-grid operators can deliver both electrification and renewable energy in rural areas. It describes four basic types of on and off-grid small power producers, as well as several hybrid combinations that are emerging in Africa and elsewhere. The guide highlights the ground-level regulatory and policy questions that must be answered by electricity regulators, rural energy agencies, and ministries to promote commercially sustainable investments by private operators and community organizations. Among the practical questions addressed is how to design and implement retail tariffs, quality of service standards, feed-in tariffs, and backup tariffs. The guide also analyzes the regulatory

implementation issues triggered by donor grants and so called top up payments It provides a primer for nonengineers on interconnection and operating standards for small power producers connected to main grids and isolated mini grids It analyzes whether the option of small power distributors used widely in Asia could be employed in Sub Saharan Africa and addresses two often ignored questions what to do when the big grid connects to the little grid and how to practice light handed regulation Finally the guide considers the threshold question of when to regulate and when to deregulate tariffs All these implementation issues are presented with specific ground level options and recommendations rather than just general pronouncements In addition to make the discussion more useful to practitioners the guide provides numerous real world examples of successful and unsuccessful regulatory and policy actions taken in Kenya South Africa and Tanzania as well as Nepal Sri Lanka and Thailand Many of the decisions are inherently controversial because they directly affect the economic interests of investors and consumers The guide highlights rather than hides these real world controversies by drawing upon candid comments of key stakeholders national utility managers mini grid operators government officials and consumers
