Accounting Definition Of Capital Goods:

National Accounts at a Glance 2014 OECD,2014-04-11 National Accounts at a Glance presents information using an indicator approach focusing on cross country comparisons **Capital in the History of Accounting and Economic Thought** Jacques Richard,Alexandre Rambaud,2021-11-29 Starting with the first scientific economists such as Cantillon 1755 and Quesnay 1758 and ending with Piketty 2019 this book explores the treatment of the concept of capital in the history of accounting and economic thought The work provides a rare juxtaposition of the reasoning discourse and writings of accountants and economists With regard to capital this approach highlights the ongoing struggle between these uncongenial twins as Kenneth Boulding put it for primacy in analysing and utilising capitalism But if they are certainly uncongenial the book also argues that it is wrong to ever classify these two disciplines as twins because they have taken very different paths ever since scientism came to dominate in economics and ethical and moral considerations were put to one side This book will be of significant interest to readers to history of economic thought critical accounting and heterodox economics
