the Watershed of ASCE This report guides professionals in selecting the most advantageous applications of geographic  
information system GIS modules and distributed models for watershed runoff Recent advances in technology offer hydrologic  
engineers watershed managers and data collection agencies unprecedented capabilities for storing and manipulating data  
With the advent of Digital Elevation Models DEM Triangulated Irregular Networks TIN Digital Line Graphs DLG and GIS  
software the use of watershed modeling among industry professionals has increased at an incredible rate With this growth it  
is increasingly difficult for practitioners to choose the most effective use of the technology This report identifies state of the  
art GIS hydrology analysis software and techniques as well as GIS types and map projections It covers data commonly  
required for hydrologic analysis limitations of available data and the integration of watershed hydrological analysis software  
and GIS techniques The appendix highlights nine examples of watershed modeling systems including the Watershed
