

It also includes helpful pages for the teacher!

Geoboard Challenge Resources

While physical geoboards are best for this activity, digital geoboards are also an option. This website has both the square and circular geoboard arrays:

<https://apps.mathlearningcenter.org/geoboard/>

***However, the circular array does not have the square around it like many physical geoboards do, so the students will not be able to complete some of the activities on the angles page.

Geoboard Challenge Teacher's Guide

Each student will need:

- 3.5 rubberband
- 3000 paper
- A copy of the challenge for
- A copy of the teacher's guide for angles on different arrays
- A geoboard (square grid for the first two activities and the circular array for the angles activity, especially for hands-on learners)

Here to the Teacher:

Make sure the class understands the initial concepts before beginning the geoboard activity. The concept page for each challenge is a handy reference for you as those who are going into the activity. You could also print a copy for each student to use during the activity, or place a copy in a binder.

Directions for Whole Group Activities:

When the teacher says, "Go!" the students will start on the first page. When they have completed it, they may draw back. The teacher goes over to check whether the first geoboard is correct. When the teacher checks all the pages on the student's list, then the student may move onto the next page. When there is a large class, it would be helpful to have another teacher or to split them up into smaller groups. The first student done, read this page very carefully and I would always get a copy of each in during the activity. 🌟

Directions for Small Group/Classroom Activities:

Students have the challenge, the reference sheet, and their supplies at a center. They work their way down the list until a partner that student sees again that it is correct before moving onto the next item on the list.
