Anatomy
The study of the structure of the human body

Physiology
The study of the function of the human body

Structural levels
The study of the human body at the level of the molecule, cell, tissue, organ, and system

- 1. **Chemical level** - study of the chemical composition of the body
- 2. **Cellular level** - study of the structure and function of the cell
- 3. **Tissue level** - study of the structure and function of the tissue
- 4. **Organ level** - study of the structure and function of the organ
- 5. **System level** - study of the structure and function of the system
- 6. **Organism level** - study of the structure and function of the whole organism

CELLS AND TISSUES

Study of the structure and function of the cell and tissue

Characteristics of a cell
1. **Basic structure** - study of the structure of the cell
2. **Cellular organelles** - study of the structure and function of the organelles

The Tissue - study of the structure and function of the tissue

Types of tissue
1. **Epithelial tissue** - study of the structure and function of the epithelial tissue- 2. **Connective tissue** - study of the structure and function of the connective tissue
- 3. **Muscle tissue** - study of the structure and function of the muscle tissue
- 4. **Nervous tissue** - study of the structure and function of the nervous tissue

NERVOUS SYSTEM

Study of the structure and function of the nervous system

Characteristics of the nervous system
1. **Control and coordination** - study of the structure and function of the nervous system- 2. **Response** - study of the structure and function of the nervous system
- 3. **Integration** - study of the structure and function of the nervous system
- 4. **Communication** - study of the structure and function of the nervous system

Types of neurons
1. **Sensory neurons** - study of the structure and function of the sensory neurons- 2. **Motor neurons** - study of the structure and function of the motor neurons
- 3. **Interneurons** - study of the structure and function of the interneurons

ENDOCRINE SYSTEM

Study of the structure and function of the endocrine system

Characteristics of the endocrine system
1. **Regulation** - study of the structure and function of the endocrine system- 2. **Response** - study of the structure and function of the endocrine system
- 3. **Integration** - study of the structure and function of the endocrine system
- 4. **Communication** - study of the structure and function of the endocrine system

Types of hormones
1. **Protein hormones** - study of the structure and function of the protein hormones- 2. **Polypeptide hormones** - study of the structure and function of the polypeptide hormones
- 3. **Amine hormones** - study of the structure and function of the amine hormones
- 4. **Steroid hormones** - study of the structure and function of the steroid hormones

REPRODUCTION

Study of the structure and function of the reproductive system

Characteristics of the reproductive system
1. **Reproduction** - study of the structure and function of the reproductive system- 2. **Development** - study of the structure and function of the reproductive system
- 3. **Regulation** - study of the structure and function of the reproductive system
- 4. **Response** - study of the structure and function of the reproductive system

Types of reproduction
1. **Asexual reproduction** - study of the structure and function of the asexual reproduction- 2. **Sexual reproduction** - study of the structure and function of the sexual reproduction

IMMUNE SYSTEM

Study of the structure and function of the immune system

Characteristics of the immune system
1. **Defense** - study of the structure and function of the immune system- 2. **Response** - study of the structure and function of the immune system
- 3. **Regulation** - study of the structure and function of the immune system
- 4. **Communication** - study of the structure and function of the immune system

Types of immune cells
1. **White blood cells** - study of the structure and function of the white blood cells- 2. **Antibodies** - study of the structure and function of the antibodies
- 3. **Macrophages** - study of the structure and function of the macrophages
