Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. Why do you need blood?

   We need blood because it maintains the vital signs of a living human. It's necessary to maintain the balance of the body. It maintains organs especially the brain, heart, lungs, liver and kidney. Without blood, all the different systems of the body would not be able to function in a symbiotic relationship

2. What organ pushes blood through your body?   the heart

Gizmo Warm-up

The Circulatory System Gizmo shows the **heart** and **blood vessels** that make up the **circulatory system**. Look at the heart.

1. How many chambers does the heart have?   4

2. Turn on **Show labels**. What are the names of the chambers?

right atrium	right ventricle.	left atrium	left ventricle

3. Do you see any "doors" that open and close as blood is pumped through the heart?   yes

   These are **heart valves**. Heart valves control the flow of blood through the heart.

4. Click **Heartbeat sound** and listen for the two parts of the heartbeat, nicknamed "lub" and "dub." Observe the heart. (Note: The recording is not in sync with the heart animation.)

   What do you think causes heartbeat sounds?   The sound of a heartbeat is caused by the heart valves opening and closing as they pump blood.

   In fact, the "lub" sound is caused by valves from the **atria** to the **ventricles** closing, and the "dub" sound is caused by the valves from the ventricles to the blood vessels closing.
