(iii) SPONTANEOUS GENERATION.

This followed an observation by scientist such as Van Helmont, (1577 – 1644) that maggots came from rotting organic matter, earth worms from mud, flies and rats from garbage. However, Redi proved that flies came from eggs and maggots

Louis Pasteur demonstrated the existence of bacteria which he said is found in all environments and that non-living matter could easily become contaminated by living matter such as bacteria if such material is not sterilized. So, it became clear that, living organisms was required in order to produce another living organisms(Theory of
