

WHAT IS A BIOME?

A biome is a large region where plants and animals live in a particular type of climate. Plants and animals that live within smaller areas of a biome have to adapt to the habitat conditions and depend on each other for survival. Major biomes are grassland, desert, tundra, rainforest, deciduous forest, tundra, wetland, and ocean. Humans have five basic needs - oxygen, water, food, shelter, and warmth. We get these from the biomes in which we live.
