- 1**
- a**
- i** transcription ; [1]
 - ii** transfer RNA / tRNA ; [1]
 - iii** ribosome ; [1]
 - iv** R is an anticodon ; temporarily binds with complementary codon on mRNA ; tRNA with a particular R / anticodon carries a specific amino acid ; ensures that the correct amino acid is placed in the growing polypeptide chain ; [max 3]
- b** deletion of one nucleotide changes the triplet code ; so a different amino acid is coded for / inserted into the polypeptide ; reference to frame shift ; all subsequent triplets / amino acids affected ; different primary structure of protein so a different tertiary structure ; active site no longer able to bind with substrate ; [max 4]
- [Total: 10]
- 2**
- a**
- i** CCA TAG CAC GTT ACA ACG
TGA AGG TAA
all bases correct ; shown as triplets ; [2]

Teacher's Manual and Resource Guide for Exploring the Sciences Herbert Drapkin,1964

Designs for Science Literacy American Association for the Advancement of Science,2001-03-22 The call for science curriculum reform has been made over and over again for much of the twentieth century Arguments have been made that the

content of the curriculum is not appropriate for meeting the individual and social needs of people living in the modern world that the curriculum has become overstuffed with topics and does not serve students especially well and above all that the curriculum does not generate the student learning it is expected to produce The latest volume in a continuing series of publications from the AAAS designed to reform science education Designs for Science Literacy presupposes that curriculum reform must be considerably more extensive and fundamental than the tinkering with individual courses and subjects that has been going on for decades Designs deals with the critical issues involved in assembling sound instructional materials into a new coherent K 12 whole The book pays special attention to the need to link science oriented studies to the arts and humanities and also proposes how to align the curriculum with an established set of learning goals while preserving the American tradition of local responsibility for the curriculum itself If fundamental curriculum reform is ever to occur a new process for creating alternatives will have to be developed Designs for Science Literacy provides the groundwork for such a process
