

Principles of Ecology

Section 2 Flow of Energy in an Ecosystem

Main Idea

Details

Scan Section 2 of the chapter. Make a list of the ways in which organisms obtain energy.

Accept all reasonable responses, such as using light energy, eating food, and breaking down dead organisms.

Review Vocabulary

energy

Use your book or dictionary to define energy. Then name the ultimate source of energy for Earth.

the ability to cause change; the Sun

New Vocabulary

autotroph

biomass

carnivore

decomposer

detritivore

food chain

food web

herbivore

heterotroph

omnivore

trophic level

Use your book or dictionary to fill in vocabulary terms in this paragraph about food chains.

In a food chain, matter and energy move from autotrophs to heterotrophs to decomposers. A food chain is made of many steps; each organism in the food chain represents a step called a trophic level. An herbivore is a heterotroph that eats only plants, whereas a carnivore preys on other heterotrophs. An omnivore eats both plants and animals. Nutrients are returned to the soil, air, and water by detritivores. A model that shows all the possible feeding relationships at each trophic level is called a food web. If you were a scientist and you wanted to determine the weight of living biomass at a certain trophic level, you would measure the biomass.

Academic Vocabulary

foundation

Use foundation in a sentence which shows its scientific meaning.

The foundation of survival of organisms is energy flow.
