When a net force acts on an object, the object's motion will change. This means that the object's speed or direction will change. For example, if a net force acts on a ball, the ball will start moving in a different direction or at a different speed.</p> <p>Another way that forces can act on an object is by changing its shape. For example, if you push on a ball, it will change shape. This is because the forces are acting on different parts of the ball, causing it to deform.</p> <p>Forces can also act on an object by changing its temperature. For example, if you heat a metal rod, it will expand. This is because the forces of the atoms in the rod are pushing each other away, causing the rod to get longer.</p> </div> <p>Answer the questions that follow.</p> <ol style="list-style-type: none"> <li>What happens when a net force acts on an object?             <ol style="list-style-type: none"> <li>The object's motion will change.</li> <li>The object's speed will change.</li> <li>The object's direction will change.</li> <li>The object's shape will change.</li> </ol> </li> <li>Which of the following is not a type of force?             <ol style="list-style-type: none"> <li>Gravitational force</li> <li>Electromagnetic force</li> <li>Frictional force</li> <li>Centrifugal force</li> </ol> </li> <li>Which of the following is not a type of force?             <ol style="list-style-type: none"> <li>Gravitational force</li> <li>Electromagnetic force</li> <li>Frictional force</li> <li>Centrifugal force</li> </ol> </li> <li>Which of the following is not a type of force?             <ol style="list-style-type: none"> <li>Gravitational force</li> <li>Electromagnetic force</li> <li>Frictional force</li> <li>Centrifugal force</li> </ol> </li> <li>Which of the following is not a type of force?             <ol style="list-style-type: none"> <li>Gravitational force</li> <li>Electromagnetic force</li> <li>Frictional force</li> <li>Centrifugal force</li> </ol> </li> <li>Which of the following is not a type of force?             <ol style="list-style-type: none"> <li>Gravitational force</li> <li>Electromagnetic force</li> <li>Frictional force</li> <li>Centrifugal force</li> </ol> </li> <li>Which of the following is not a type of force?             <ol style="list-style-type: none"> <li>Gravitational force</li> <li>Electromagnetic force</li> <li>Frictional force</li> <li>Centrifugal force</li> </ol> </li> <li>Which of the following is not a type of force?             <ol style="list-style-type: none"> <li>Gravitational force</li> <li>Electromagnetic force</li> <li>Frictional force</li> <li>Centrifugal force</li> </ol> </li> <li>Which of the following is not a type of force?             <ol style="list-style-type: none"> <li>Gravitational force</li> <li>Electromagnetic force</li> <li>Frictional force</li> <li>Centrifugal force</li> </ol> </li> </ol> <div style="text-align: right;">  </div>
